

THE AI LAYER FOR BUSINESS

We embed AI into the tools, workflows and customer experiences your business already uses.

AI WEB

AI AGENTS

AI AUTOMATION

ENTERPRISE AI LAYER

KEEP YOUR SYSTEMS. REPLACE THE MANUAL WORK BETWEEN THEM.

ML Kart is a productized AI company

Not a traditional consultancy. We deploy reusable AI products and infrastructure into the way businesses already operate.

AI WEB

Build

AI-powered websites, customer portals, chatbots and voice experiences that can answer, qualify, sell and schedule.

AI AGENTS

Automate

Deploy reusable agents for sales, support, operations, documents, research and repetitive business workflows.

AI LAYER

Transform

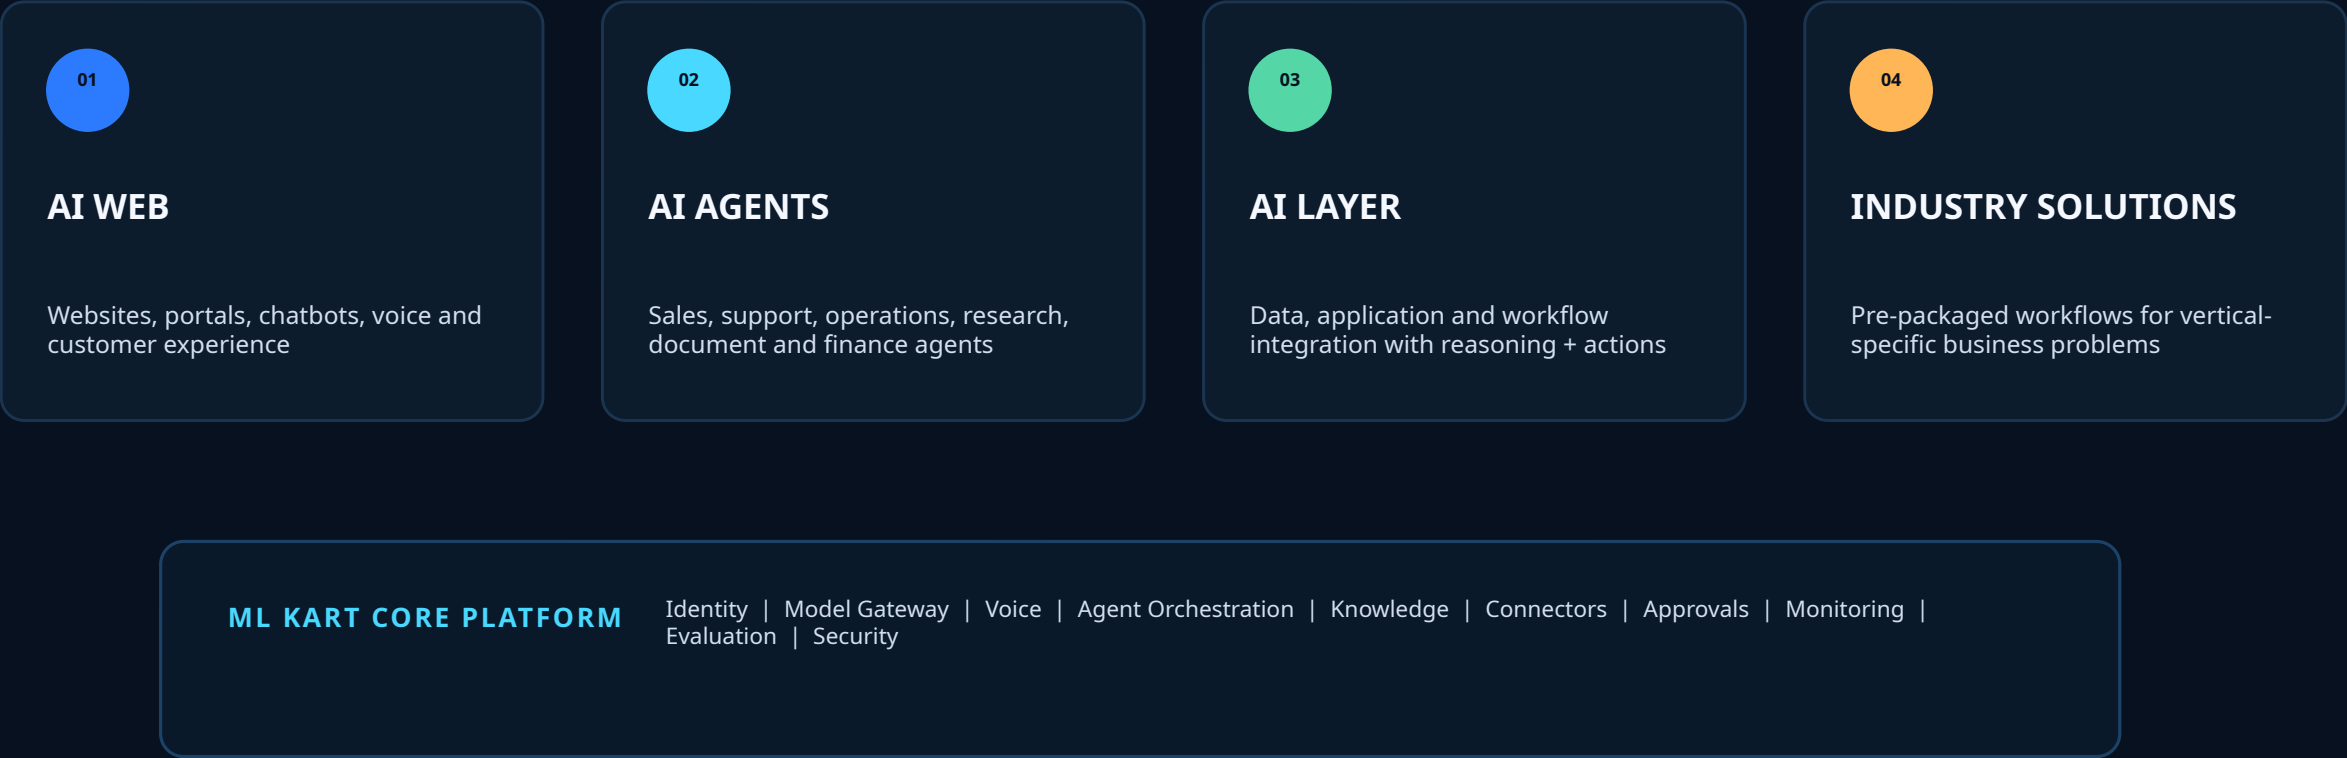

Connect AI across company data, applications and workflows so it can understand, reason, recommend and act.

Core promise

ML Kart embeds AI into your business without forcing you to replace the systems that already work.

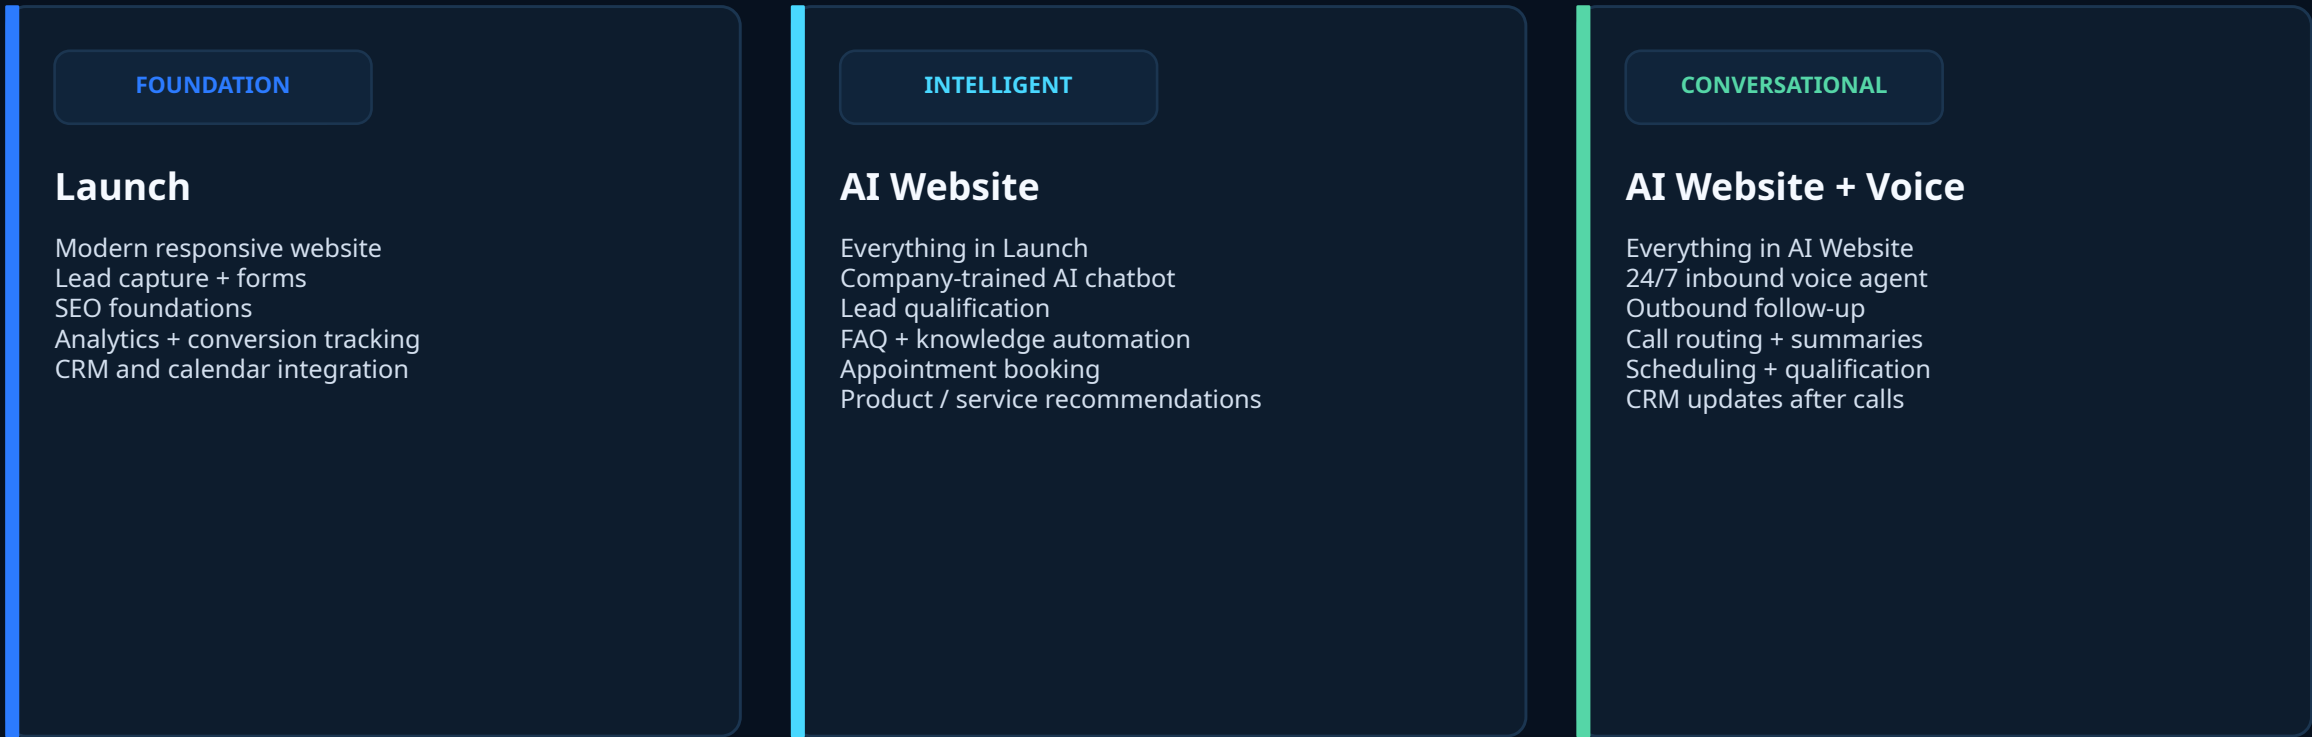

One platform. Multiple ways to put AI to work.

Each customer gets a configuration of the same reusable ML Kart capabilities - not a one-off custom codebase.

ML Kart AI Web

Digital experiences that do more than look good - they answer, sell, qualify, schedule and support.

Position it as: **An AI-powered digital storefront that can talk, sell, support and book customers 24/7.**

ML Kart AI Agents

Reusable digital workers configured around a company's data, tools, policies and approval rules.

SALES

Qualify leads, follow up, book meetings, update CRM

SUPPORT

Answer questions, search knowledge, create + route tickets

VOICE

Handle inbound/outbound calls, scheduling and routing

OPERATIONS

Read, check, reconcile, route, notify and update systems

DOCUMENT

Extract, classify, validate and reason over business documents

RESEARCH

Monitor markets, vendors, competitors and internal information

FINANCE

Invoices, expenses, reconciliations and review workflows

ANALYTICS

Ask data questions, investigate drivers and generate evidence-backed insights

Agents are not isolated chatbots. They are connected to real business tools and execute within defined permissions and human approval boundaries.

ML Kart AI Layer

The premium enterprise offering: connect AI to the systems a company already uses and automate the work between them.

Keep your systems. Replace the manual work between them.

Productized workflows for high-value vertical problems

Sell outcomes by industry while keeping the underlying ML Kart platform consistent.

REAL ESTATE

- Listing assistant
- Lead qualification
- Showing scheduling
- Voice answering
- CRM follow-up
- Property document AI

HEALTHCARE

- Clinic website
- Scheduling + reminders
- Administrative intake
- FAQ + call automation
- Document workflows
- Internal knowledge assistant

FINANCIAL SERVICES

- Document intelligence
- Operations automation
- Investigations
- Merchant/customer intelligence
- Compliance workflow assistance
- AI analytics

RESTAURANTS

- AI menu assistant
- Voice reservations
- Catering lead intake
- Ordering support
- Customer service
- Marketing automation

HOME SERVICES

- 24/7 call answering
- Issue intake
- Service-area checks
- Job scheduling
- Technician routing
- CRM updates

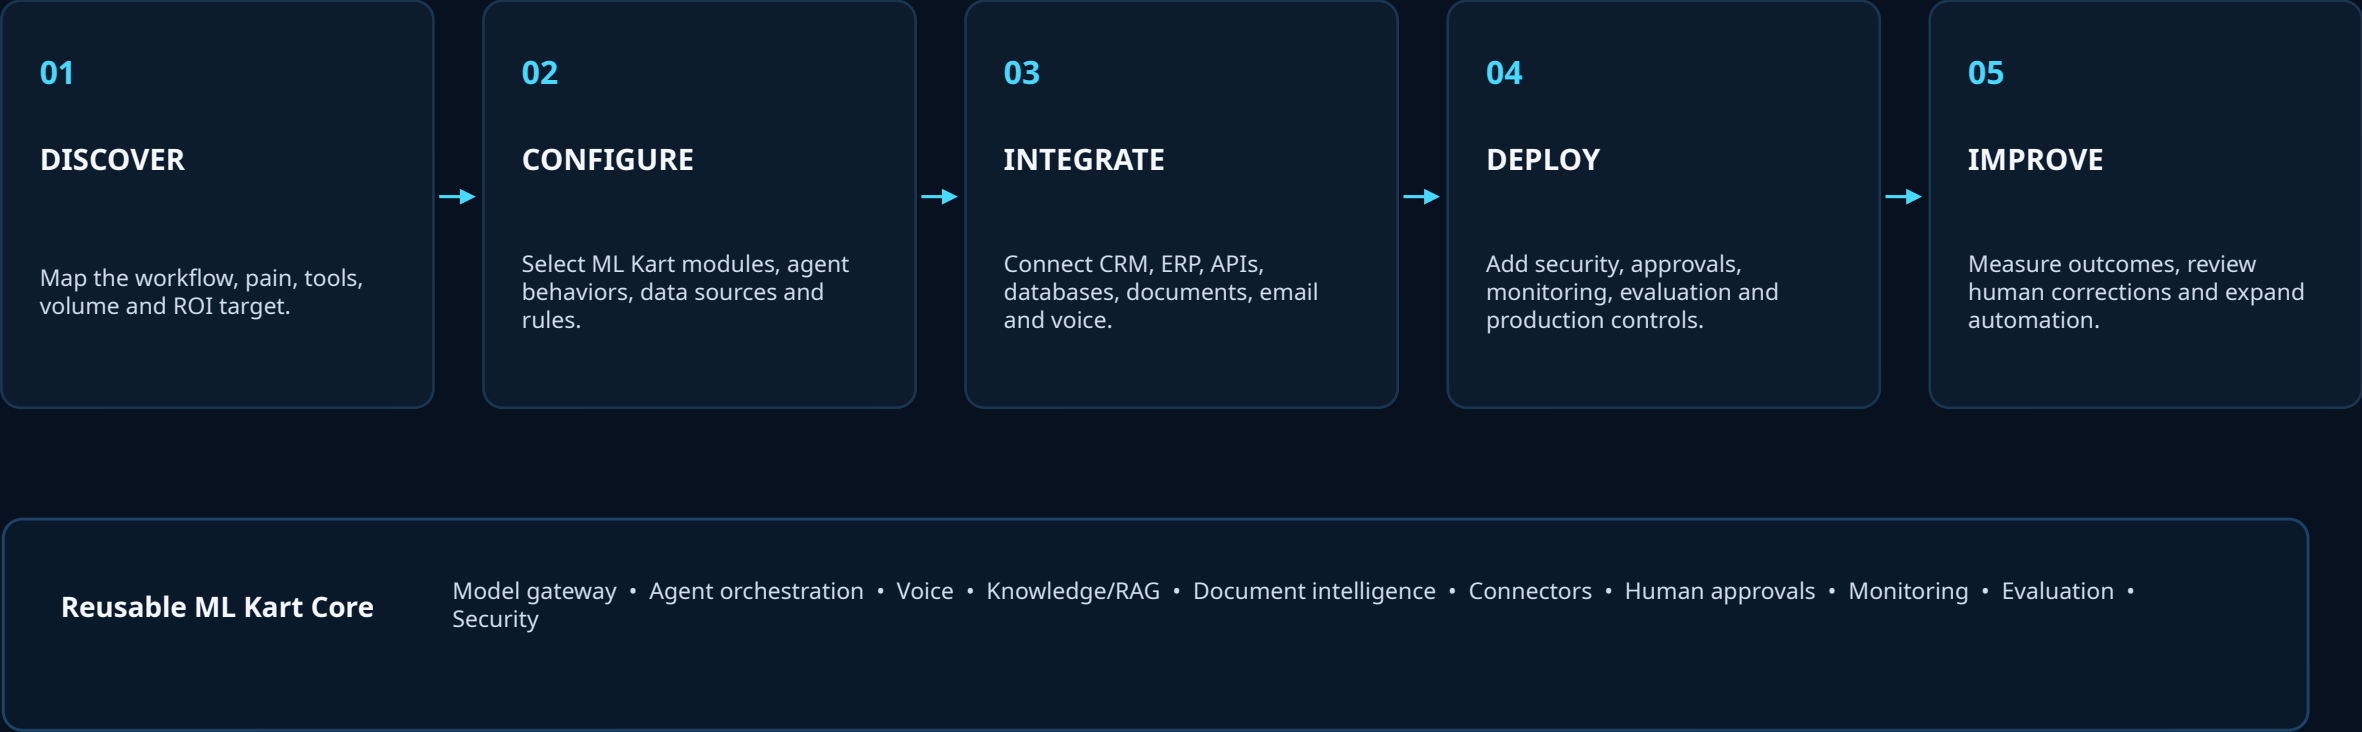

PROFESSIONAL SERVICES

- Client intake
- Knowledge search
- Document review
- Scheduling
- Billing workflows
- Internal productivity agents

Healthcare and regulated-industry deployments require customer-specific security, privacy and compliance review before production use.

A repeatable product deployment model

The customer experience feels tailored; the technology underneath stays reusable.

Implementation + recurring platform revenue

Illustrative packaging. Price around business value, complexity, integrations and usage - not developer hours.

LAUNCH	GROWTH	AUTOMATE	ENTERPRISE
\$2.5K - \$7.5K	\$5K - \$15K	\$10K - \$30K	\$25K - \$150K+
setup	setup	implementation	implementation
\$199 - \$499 / mo	\$500 - \$2K / mo	\$1K - \$5K / mo	\$3K - \$25K+ / mo
recurring platform	recurring platform	recurring platform	recurring platform
Website + lead capture + AI-ready foundations	Website + chatbot + voice + CRM automation	Agent or workflow automation for a defined business process	Multi-system AI Layer, governance, analytics and custom integrations

Land with one measurable workflow. Expand as ML Kart connects more customer touchpoints, teams and systems.

Built to look and behave like a product company

The differentiation is not “we know AI.” It is a repeatable way to embed AI safely into real operating workflows.

PRODUCTIZED

Reusable modules instead of rebuilding every customer project from zero.

SYSTEM-AWARE

AI connects to the software, data and processes businesses already use.

ACTION-ORIENTED

Beyond chat: agents can route, update, schedule, create, trigger and escalate.

HUMAN-CONTROLLED

Approvals, permissions and escalation paths are part of the deployment design.

MEASURABLE

Each deployment begins with a business outcome and tracks operational impact.

EXPANDABLE

Start with one workflow and progressively add more agents, systems and teams.

ML Kart = the company businesses call when they want to put AI inside the way they work.

EMBED AI. AUTOMATE WORK. GROW THE BUSINESS.

From customer-facing websites and voice agents to internal workflows and enterprise systems, ML Kart adds the intelligence layer without forcing a business to start over.
